Hello,

My name is Susan Sangster, I live in Old Saybrook and my Toyota Rav 4 has severe corrosion underneath. My garage was appalled at the condition of the undercarriage. I had hoped to keep this car for quite a while as it has just under 100,000 miles, but with the amount of rust I'm going to be forced to try to get what I can for it.

I've lived in CT my entire life and never had a car rot like this one, which I purchased new.

This is a very large expense for me having to replace such a large ticket item.

Perhaps we should go back to what ever we were using in the past to help solve this problem.

Susan Sangster
